

Composition

- Sulfur amino acids (cysteine, methionine) - strengthen the hair matrix, significantly reduce hair's susceptibility to damage,
- Oat extract - nourishes and rebuilds the hair coating, prevents hair from drying out,
- Ginseng extract - strengthens the hair matrix, prevents excessive hair loss,
- Hyaluronic acid - significantly increases the level of hydration,
- Macadamia nut oil - perfectly smoothes, nourishes and regenerates brittle and damaged hair. Effectively prevents split ends.

Hair porosity - the key to conscious care.

- Low porosity hair - low porosity hair most often includes flowing, straight, smooth and slippery hair. If the hair lacks volume, is limp, often becomes greasy, does not want to be styled and dries slowly, it belongs to the low porosity group. This type of hair does not wave or frizz even in high humidity. Low porosity hair cuticles are tightly arranged, which makes it more difficult to absorb water, dries slower and is less susceptible to coloring.
- Medium porosity hair - medium porosity hair most often includes wavy hair, not perfectly smooth, with a tendency to curl. If the hair is slightly wavy, tends to be rough and dull, dries relatively quickly, is not always easy to comb, has a tendency to split ends, it belongs to the medium porosity group. This type of hair often combines the features of high and low porosity hair. Due to improper care, medium porosity hair may fall out excessively and become damaged.
- High porosity hair - high porosity hair most often includes curly, dry hair, prone to frizz and static electricity. If the hair is often subjected to coloring and bleaching treatments, it often breaks and crumbles, and takes a long time to dry, it belongs to the high porosity group. This type of hair is considered the most damaged and requires special attention and care.

INCI

Aqua, Cocamidopropyl Betaine, Disodium Laureth Sulfosuccinate, PEG 120 Methyl Glucose Dioleate, PEG-40 Hydrogenated Castor Oil, Hydroxypropyl Guar Hydroxypropyltrimonium Chloride, Salicylic Acid, Glycerin, Sorbic Acid, Sodium Hyaluronate, Ginseng Root Extract, Avena Sativa Kernel Extract, Lecithin, Sorbitol, Panthenol, Glucose, Trilaureth-4-Phosphate, Cysteine, Methionine, Macadamia Ternifolia Seed Oil, Lactic Acid, Parfum.
