

## **Composition/effect**

The effective Melano peel treatment does more than just lighten the skin, as it treats all types of melanin-related disorders and effectively reduces scarring caused by years of acne thanks to the powerful ingredients in each of the five products, especially the Melano peel cream.

The Melano peel cream has an anti-ageing effect that slows down skin ageing by removing dead cells, stimulating the skin's collagen production and preventing the reappearance of age spots.

In addition to the exfoliating cream, other products in the complete pack include the degreasing and purifying Degreasing Solution, the brightening Pre-Treatment Solution, which prepares the skin for exfoliation, and the Melano peel Mask, which also has a brightening and revitalizing effect.

The Melano Pack also contains a moisturizing cream that is applied immediately after the Melano peel cream. It acts as an intensive moisturizer.

When you buy the Melano peel Pack, you get a variety of products that are effective on their own, but above all in combination with each other to improve skin tone and texture.
