It is based on a multifunctional complex of amino acids glycine and proline, which stimulates natural cell growth and activates repair processes in the skin.

The addition of lipoic acid neutralizes free radicals and increases the effectiveness of glutathione, increasing its level in the cell. Supplementing this ingredient is crucial in the care of aging skin because it performs many important functions. It reduces wrinkles, improves skin texture, increases its elasticity, thickens and tightens it, and brightens it.

Mannitol in synergy with hyaluronic acid protects the skin against water loss, optimizing the level of hydration.
