

Contraindications

- Hypersensitivity to one of the ingredients present in the product,
- Pregnancy or breastfeeding
- minors,
- Do not inject into areas with infectious or inflammatory skin problems,
- Avoid areas already treated with a filling product permanently and/or temporarily.

Side effects

- After the injection you may experience temporary pain, warmth, redness or swelling,
- These secondary symptoms can be alleviated with ice and/or local anesthetic ointments applied to the affected area,
- These side effects usually disappear within a short time.
